

Sub.	:	Maths
Std.	:	VIII th - S.B.

Answer	Paper
11. Stat	tistics

Marks: 20

- Q.1 : A) Select the most appropriate Alternative. 02
 - 1) If the mean of 10 observations is 12, what is their sum ?

2) If the mean of 3, 7, 11 and x is 9, what is the value of x ?

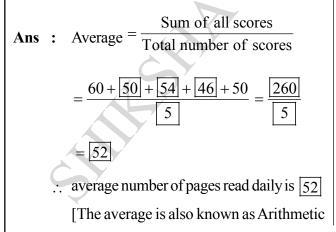

Ans : d) 15

- **: B)Solve the following.** 01
- 1) What is mean of first five prime number?
- **Ans** : First five prime number are 2, 3, 5, 7, 11

So, mean =
$$\frac{2+3+5+7+11}{5}$$

$$=\frac{28}{5}=5.6$$

- Q.2 : A) Solve any one of the following. (Activity) 02
 - The number of pages in a book Ninad read for five consecutive days were 60, 50, 54, 46, 50. Find the average number of pages he read everyday.

mean or Mean.]

2) The following table shows the electricity (in units) used by 25 families of Eklara village in a month of May. Complete the table and answer the following questions.

Ans :

Electricity ued	Number of families	$\mathbf{f}_{i} \times \mathbf{x}_{i}$
(Units) x _i	(frequency)f _i	-i -i
30	7	210
45	2	90
60	8	480
75	5	375
90	3	270
	N = 25	$\sum f_i x_i = 1425$

- : **B)Solve any one of the following.** 02
- 1) The sides of two squares are 4cm and 10 cm respectively. What is their mean perimeter ?
- Ans : The sides of two squares are 4 cm and 10 cm
 - So, their perimeters are 16 cm and 40 cm

[\therefore perimeter of square = 4 × side]

Therefore mean
$$=\frac{16+40}{2}$$

$$=\frac{56}{2}$$

= 28 cmHence, the mean perimeter is 28 cm.

Ans : a) 120

2) The weights (in kg) of 10 boys from a team are recorded as follows :

55, 53, 48, 47, 54, 49, 64, 45, 55, 50. Find their mean weight.

Ans : Mean = $\frac{\text{Sum of all scores}}{\text{Total number of scores}}$

$$=\frac{55+53+48+47+54+49+64+45+55+50}{10}$$

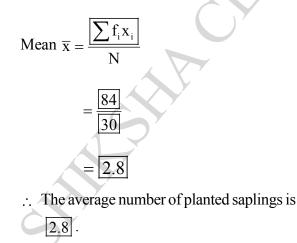

$$=\frac{520}{10}=52$$

Thus, The mean weight of boys is 52 kg.

- Q.3 : A)Solve any one of the following. (Activity) 03
 - 1) The following table shows the number of saplings planted by 30 students. Fill in the boxes and find the average number of saplings planted by each student.

Ans :

Number of saplings (Scores)x _i	Number of students (frequency)f _i	$\mathbf{f}_{i} \times \mathbf{x}_{i}$
1	4	4
2	6	12
3	12	36
4	8	32
	N = 30	$\sum f_i x_i = \boxed{84}$

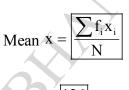

2) The frequency distribution table is given below. Complete the column $f_i \times x_i$ and find the mean score.

Score(x _i)	Tally marks	Frequency f _i	f _i x _i
2		4	
3		3	
4)M M	10	
5)M M	9	
6		4	
		N =	$\sum f_i x_i =$

Ans

Score(x _i)	Tally marks	Frequency f _i	f _i x _i
2		4	8
3		3	9
4	THL THL	10	40
5)M M	9	45
6		4	24
		N = 30	$\sum f(x) = 126$

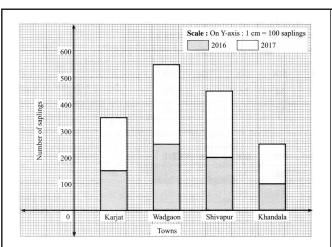

$$=\frac{\boxed{126}}{30}$$
$$=\boxed{4.2}.$$

- **B) Solve any one of the following.** 03
- 1) In the following table number of sapling planted in the years 2016 and 2017 in four towns is given. Show the data with the help of subdivided bar graph.

town/year	Karjat	Wadgoan	Shivapur	Khandala
2016	150	250	200	100
2017	200	300	250	150

Ans :

town/year	Karjat	Wadgoan	Shivapur	Khandala
2016	150	250	200	100
2017	200	300	250	150
Total	350	550	450	250

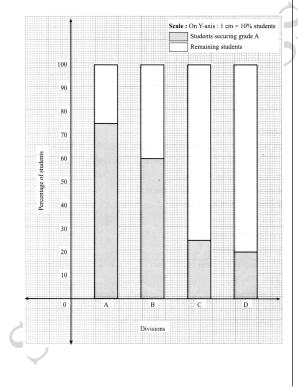

2) Show the following information by a percentage bar graph.

Division of standard 8	A	B	С	D
Number of students	45	33	10	15
securing grade A	73	55	10	15
Total number of students	60	55	40	75

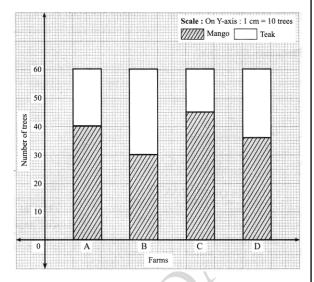

Ans :

Division of Std.8	Α	В	С	D
Numbe of				
students sec uring	45	33	10	15
grade A				
Total number	60	55	40	75
of students	00	55	40	15
Percentage of	45	22	10	15
students sec uring	$\frac{45}{60} \times 100 = 75$	$\frac{33}{55} \times 100 = 60$	$\frac{10}{40} \times 100 = 25$	$\frac{15}{75} \times 100 = 20$
grade A	00	33	40	75
Percentage of				
the remaining	100 - 75 = 25	100 - 60 = 40	100 - 25 = 40	100 - 20 = 80
students				

- Q.4 : Solve any one of the following.
 - 1) Observe the subdivided bar graph given below and answer the following questions :

04

i) What is the ratio of the number of teak trees to the number of mango trees in farm A?

Ans : 1:2

ii) What is the total number of mango trees in four farms ?

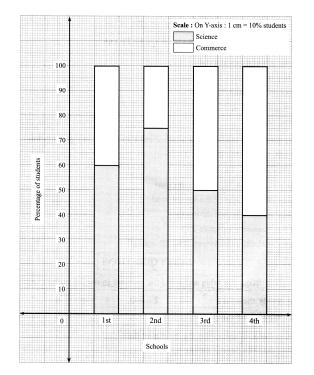

Ans : 151

- iii) What is the ratio of the number of mango trees to the number of teak trees in the farm D ?
- **Ans :** 3:2
 - iv) In which of the four farms is the number of teak trees the highest ?
- Ans : Farm B.
 - 2) The following data is collected in a survey of some students of 10th standard from some schools. Draw the percentage bar graph of the data.

School	1st	2nd	3rd	4th
Inclination towards science stream	90	60	25	16
Inclination towards commerce stream	60	20	25	24

Ans :

School	1st	2nd	3rd	4th
Inc lim ation towards science stream	90	60	25	16
Inclination towards commerce stream	60	20	25	24
Total	150	80	50	40
Percentage inclination towards science	$\frac{90}{100} \times 100 = 60$	$\frac{60}{80} \times 100 = 75$	$\frac{25}{50} \times 100 = 50$	$\frac{16}{40} \times 100 = 40$
Percentage inclination towards commerce stream	100 - 60 = 40	100 - 75 = 25	100 - 50 = 50	100 - 40 = 60

Q.5 : Solve any one of the following.

1) The number of peas in each of the 50 pods is given below :

4, 3, 2, 4, 3, 4, 3, 3, 2, 8, 2, 3, 3, 4, 3, 4, 4, 5, 2, 8, 8, 2, 5, 3, 4, 4, 3, 6, 2, 3, 4, 4, 3, 3, 2, 6, 4, 4, 7, 2, 7, 6, 3, 6, 6, 6, 7, 6, 7, 3. Find the mean number of peas in each

pod.

Ans : Here, we make a frequency table of the peas in the pods. The minimum number is 2 and the maximum number is 8.

Number	Tally Marks	Frequency	
of pass in		(f _i)	$\mathbf{f}_{i} \times \mathbf{x}_{i}$
a pod (x _i)			
2		8	16
3		15	45
4		12	48
5		2	10
6		7	42
7		3	21
8		3	24
		Total $N = 50$	$\sum f_i x_i = 206$

Mean
$$\overline{x} = \frac{\sum f_i x_i}{N} = \frac{206}{50} = 4.12$$

- \therefore The mean number of peas in each pod is 4.12.
- 2) The number of Science and Mathematics projects submitted by Model high school, Nandpur in last 20 years at the state level science exhibition is :

2, 3, 4, 1, 2, 3, 1, 5, 4, 2, 3, 1, 3, 5, 4, 3, 2, 2, 3, 2. Prepare a frequency table and find the mean of the data.

Ans :

03

Number of projects x _i	Tally Marks	Number of years f _i	$\mathbf{f}_{i} \times \mathbf{x}_{i}$
1		3	3
2		6	12
3		6	18
4		3	12
5		2	10
		N = 20	$\sum f_i x_i = 55$

Mean =
$$=\frac{\sum f_i x_i}{N} = \frac{55}{20} = 2.75$$

The mean of the data is 2.75.
